Funded by the Horizon 2020 Framework Programme
of the European Union

Outline

- **Overview on WG3**
- **Results/outcomes**
- **Planned activities**

of the European Union

Focus of WG3

This WG focuses on Human Computer Interaction(HCI) tasks in multilingual and multimodal scenarios applying LG models to distinct use cases, such as conversational agents, with 2 main directions:

- New **answer generation** techniques where the (human) agent will receive suggestions
- New techniques for **conversational quality estimation and sentiment analysis**

MULTI-TASK
MULTI-LINGUAL
MULTI-MODAL

Funded by the Horizon 2020 Framework Programme
of the European Union

Main challenges for WG3

- **Scarcity** of multimodal and multilingual datasets for chat
- **Benchmarking** the models applied
- New **metrics** established for multilingual scenarios and how to adapt those for multilingual conversational dialogues

of the European Union

Heritage from the previous WG3 team:

- Plan a survey paper on NLG for dialogue including languages other than English.
- Identify relevant datasets and create a repository.
- Collect a multilingual dataset (disregarded by the team).

Results/outcomes:

- Ramos, R., Pereira, P., Moniz, H., Carvalho J., and Martins, B. (2021) Retrieval Augmentation for Deep Neural Networks, IJCNN 2021
- Gosko, D., Znotins, A., Skadina, I., Gruzitis, N., Nespore-Berzkalne G. (2021) Domain Expert Platform for Goal-Oriented Dialog Collection, Proceedings of the 16th Conference of the European Chapter of the Association for Computational Linguistics (EACL): System Demonstrations.
- Survey on Emotion Recognition in conversations (to be submitted this month)
- Draft of a report on available multilingual datasets for conversational data (to be shared with the members)

MULTI-MODAL**

Funded by the Horizon 2020 Framework Programme
of the European Union

Planned activities:

- **Participation in the cross-topic research roadmap with other members**
- **Conference and journal papers on sentiment analysis in conversational data and metrics to assess the quality of the dialogue**
- **Benchmarking? Participation in international challenges**
- **Responsible AI initiatives? We are working with 3 modalities with severe ethic aspects**
