

2022 Venice Multi3Generation Management Committee Meeting

The Multi3Generation 2022 Management Committee meeting was held in Venice at Ca' Foscari University (19 September 2022). This MC meeting was co-located with the Multi3Generation training school on Creative Natural Language Generation (19-23 September 2022) (<https://multi3generation.eu/2022/06/24/m3g-cost-action-training-school-on-creative-natural-language-generation/>).

The invited talk in the morning (from 11:00 to 12:30) by Carlo Strapparava about Computational Exercises of Creative Language was the overlapping event between the training school and the MC meeting in the afternoon. Trainees and MC delegates attended it, and it was a good starting point to frame the topic of the school, leaving the audience with enough open questions to be explored in the following days.

After lunch, the MC meeting went on from 14:30 to 18:00. 20 delegates from 15 countries attended it. Unfortunately, no delegates were attending online.

After the chair's welcome to participants by Anabale Barreiro there was a verification of the quorum that was not reached. Then Anabela Barreiro proposed a recap of the minutes from the last meeting and updates about Action membership, participation, and provisional substitution.

An update about the budget from the Grant Holder was discussed, followed by updates about progress in each working group (but just Irene Russo from WG4 was present at the meeting).

The final part of the meeting was devoted to planning: proposals for the next Grant period, especially about where to hold the next MC meeting and training schools.
